# Miami Worldcenter

Miami Worldcenter's lifestyle-driven "high-street" retail component is the centerpiece of the development's 27-acre master plan, featuring approximately 300,000 SF of retail, food and beverage, and entertainment space. An open-air shopping promenade runs North and South from Northeast 10th Street to Northeast 7th Street and between Northeast 1st and 2nd Avenues. A large public plaza will be surrounded by shops and restaurants, creating a central gathering place and outdoor event space. Miami Worldcenter's development team has already completed 150,000 SF of retail space, with another 130,000 SF currently under construction and nearing delivery.

# The Blue Zones Center

# The Blue Zones Center

Developing buildings centered around well-being, preventative medicine and technology integration, The Blue Zones Center is re-inventing the way we plan, design, and build healthcare environments.

Blue Zones, Adventist Health and Legacy Hotel & Residences have partnered to open the first flagship well-being and medical facility that will completely change the way consumers access and consume healthcare. Built on the Blue Zones research, standards, and principles, and Adventist Health's 150-year well-being heritage.

The Blue Zones Center will be a first-of-its-kind 160,000 square-foot health and well-being center, located in the heart of Miami's new downtown, Miami Worldcenter. It marks Adventist Health's and its subsidiary Blue Zones' next chapter in putting their longevity principles into practice via this first flagship center for well-being.

It is being built on the powerful new trends of consumerism, med-tech, and a flip from the old model of treating the sick to a system built around prevention and well-being. Services will include diagnostic, surgical, medical, spa, fitness, lifestyle medicine, and well-being improvement programming.

Building spaces that allow everyone to live longer, happier, and healthier lives

These drawings are conceptual only and are for the convenience of reference. They should not be relied upon as representations, express or implied, of the final detail of the residences. Units shown are examples of unit types and may not depict actual units. Stated square footages are ranges for a particular unit type and are measured to the exterior boundaries of the exterior walls and the centerline of interior demising walls and in fact vary from the area that would be determined by using the description and definition of the unit set forth in the declaration (which generally only includes the interior airspace between the perimeter walls and excludes interior structural components). Note that measurements of rooms set forth on this floorplan are generally taken at the greatest points of each given room (as if the room were a perfect rectangle), without regards for any cutouts. Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length times width. All dimensions are approximate and may vary with actual construction, and all floor plans and development plans are subject to change.
